Tallinn Airport Net Zero 2030 roadmap

2021 MAPPING IMPROVEMENT POSSIBILITIES

CONTINUOUS CARBON OPTIMISATION

BECOMING NET ZERO

2030

Setting targets to become net zero airport in 2030

Investing in alternate energy production to increase usage of alternate energy

Building additional solar parks

Rising awareness inside the organisation and our partners

Carbon optimising requirements added to investments and

Mapping energy usage and heat production optimisation possibilities and implementing it

Mapping possibilities to renew our equipment park

Implementing waste management according to net zero commitment

Optimising staff carbon footprint

Rising travellers awareness and promoting carbon footprint minimalization

Optimising operational processes

Optimising maintenance processes

Optimising fire training processes

Continue investing in alternate energy production to increase usage

of alternate energy to 100%

Optimising taxi and hold time processes

Optimising landing and takeoff processes

Optimising APU usage

Continue renewing our infrastructure according to net zero

park commitment

Continue renewing our equipment according to net zero commitment

Becoming

net zero

airport
