

# ACI-APN - Europe Punctuality Report: June 2022

For Immediate Release 12 Aug 2022

In June 2022, performance in terms of punctuality for the APN-E airports sharply decreased, with 15 minute arrival punctuality at 61.2% and departure punctuality at 52.1% when compared to June 2021 as passenger numbers increased as the summer season continued.

In the wider context, many airports continue to suffer in the challenging labour market, with staffing throughput related delays at many airports remaining an issue in June 2022, this was also in combination with the highest ATFM delays observed since July 2019.

ATFM en-route delays increased with high delays observed in Karlsruhe UAC, Warsaw ACC and Reims ACCs. French ATC industrial action occurred from 25 to 27 June. There were also technical issues at Bordeaux and Geneva ACCs, Zurich ACC suffered ATC system failures on 15, 18, 21 and 22 June.

Frankfurt FRA suffered from reactionary, weather and en-route ATFM delay causes.

Airports ranked alphabetically, and by numbers of commercial flights operated on arrival and departure (ACI Europe Airport Grouping - based on 2019 data).

Only passenger flights are taken into consideration, excluding General Aviation and Business Aviation. Data includes flights of IATA Service Type Codes: B (Additional Flights - Passenger - Shuttle Mode), C (Charter - Passenger - Passenger Only), G (Additional Flights - Passenger - Normal Service), J (Scheduled - Passenger - Normal Service), L (Charter - Passenger/Cargo/Mail - Passenger and Cargo and/or Mail), O (Charter - Special Handling - Charter requiring special handling), Q (Scheduled - Passenger/Cargo - Passenger/Cargo in Cabin), R (Additional Flights Passenger/Cargo - Passenger/Cargo in Cabin), S (Scheduled - Passenger - Shuttle Mode).

15' Punctuality (Arrival A15/Departure D15): It is the percentage of punctual flights on arrival/on departure (15 minutes) in relation to the total number of operated flights on arrival/on departure. With regard to the 15 minutes punctuality, all flights are considered to be punctual when they are delayed up to 15:59 mins.

Average Arrival/Departure delay per flight: the total delay minutes of flights delayed one minute or more are divided by the total amount of operated flights on arrival or on departure.

The group was established in 2009 with the objective to standardise the reporting of airport punctuality data, to exchange best practices concerning operational performance and predictability at European airports. Under the European Commission Implementing Regulation (EU) 2019/317 these airports must submit their operational data, on a monthly basis, to the Performance Review Unit (PRU) and CODA of EUROCONTROL. By publishing punctuality data from this validated source, APN – Europe assures the accuracy of the performance data in the public domain and are not dependent on third party interpretation.
