ACI-APN - Europe Punctuality Report: November 2023

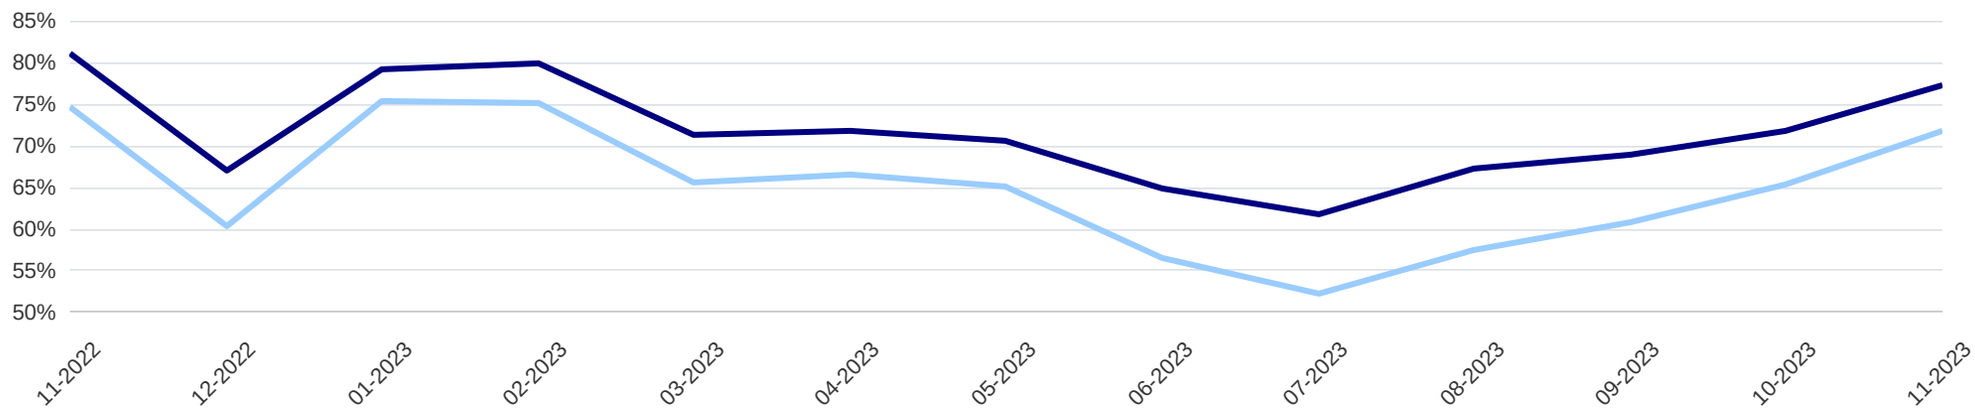

For Immediate Release 18 Jan 2024

In November 2023, airport performance in terms of punctuality declined a little when compared to November 2022, with arrival punctuality at 78% and departure at 72%.

Storm Ciaran caused disruption to the UK and Ireland airports on 02 November. 4-Flight live trials in Paris ACC generated ATFM delays on 16 and 18 November. ATC industrial action in France affected the network from 19 to 21 November.

Seasonal weather conditions (mainly low visibility and high winds) impacted Amsterdam AMS. Frankfurt FRA experienced delays due to rotational, airport facilitates, ramp handing and weather causes. Lisbon LIS continues to suffer from aerodrome capacity delays, this was also combined with weather, with 17 November being a notably bad day for delays.
