ACI-APN - Europe Punctuality Report: January 2024

For Immediate Release 22 Jan 2024

In January 2024, airport performance in terms of punctuality fell slightly when compared to January 2023, with arrival punctuality 76% and departure at 73%.

A series of disruptive weather events including named storms affected the north-western part of the network, Storm Henk on 02 January, strong winds at Amsterdam AMS on 15-16 January, snow in Germany on 17 January, Storm Isha on 21-22 January; and Storm 'Jocelyn' on 24 January.

Oslo OSL was affected by snow during January with peaks in delay observed on 17, 22 and 26 of January, with the 17 being the worst for delays and disruption. 4-flight trials influenced performance at Paris CDG throughout the month. Lisbon was also impacted by weather (mainly low visibility) and aerodrome capacity delays. Munich saw punctuality drop, driven by freezing rain on the 17 January which significantly disrupted operations. Frankfurt FRA suffered from rotational delays, handling and weather delays.

The group was established in 2009 with the objective to standardise the reporting of airport punctuality data, to exchange best practices concerning operational performance and predictability at European airports. Under the European Commission Implementing Regulation (EU) 2019/317 these airports must submit their operational data, on a monthly basis, to the Performance Review Unit (PRU) and CODA of EUROCONTROL. By publishing punctuality data from this validated source, APN – Europe assures the accuracy of the performance data in the public domain and are not dependent on third party interpretation.
