Italy's ENAV Selects Harris Corporation's Aircraft Arrival Management Solution

Highlights:

- Helps Italy's air navigation service provider manage the flow of arriving aircraft
- Supports Italy's busiest airports, including Rome Fiumicino and Milan Malpensa
- Represents the fourth major implementation of OSYRIS E-AMAN in Europe

MELBOURNE, Fla., August 3, 2017 — Italy's air navigation service provider, ENAV S.p.A., has selected Harris Corporation (NYSE:HRS) to improve the efficiency of the nation's air traffic management (ATM) network.

Harris' OSYRIS Extended Arrival Manager (E-AMAN) solution will help ENAV manage the flow of arriving aircraft by making the best use of available ATM resources, such as runways and airspace. It balances traffic demand and optimizes traffic flows in and out of capacity constrained airports, while enabling collaborative management. The system will support some of Italy's busiest airports, including Rome Fiumicino and Milan Malpensa, as well as the nation's four area control centers located in Rome, Milan, Padua and Brindisi.

"The OSYRIS E-AMAN system helps air traffic controllers better manage cross-border arrivals and departures," said Kelle Wendling, vice president and general manager, Harris Mission Networks. "ENAV's adoption of the OSYRIS E-AMAN system represents the fourth major implementation of the system in Europe and supports Harris' overall strategy of becoming a global ATM technology provider."

Harris' OSYRIS AMAN solution has been fielded for more than 15 years and is installed in more than 25 locations worldwide. Each solution is engineered specifically for the individual customer, as airspace needs around the world vary. System benefits include common terminal maneuvering area information for high-density airport operations; advanced delay sharing for delay distribution across several area control centers and sectors; extended horizon and cross border arrival management; and advanced runway allocation strategy/runway balancing capabilities.

About Harris Corporation

Harris Corporation is a leading technology innovator, solving customers' toughest mission-critical challenges by providing solutions that connect, inform and protect. Harris supports government and commercial customers in more than 100 countries and has approximately \$6 billion in annual revenue. The company is organized into three business segments: Communication Systems, Electronic Systems and Space and Intelligence Systems. Learn more at harris.com.

Forward-Looking Statements

This press release contains forward-looking statements that reflect management's current expectations, assumptions and estimates of future performance and economic conditions. Such statements are made in reliance upon the safe harbor provisions of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. The company cautions investors that any forward-looking statements are subject to risks and uncertainties that may cause actual results and future trends to differ materially from those matters expressed in or implied by such forward-looking statements. Harris disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise.
